SKILLS

Project Management 🗓 Planning | Distributed Team Management | Code Quality Assurance.

Technologies 🛠 HTML, CSS, Bootstrap, JavaScript, Core PHP, Laravel Framework, CodeIgniter Framework, jQuery, Ajax, MVC, JSON, GitHub (version control), MySQL

Database 🗄 MySQL

Tools 🛠 Postman | GitHub | VS CODE

Industry 🏢 social media | HRMS | E-commerce Industry

Languages 🗣 English | HINDI

WORK EXPERIENCE

1. Neural Info Solution | April 2022 - Present

Projects: APSHWP

August 2024 – Present

- Collaborated with clients to gather requirements and translate them into technical solutions.
- Developed dynamic and reusable UI components by consuming JSON responses from Adobe Experience Manager (AEM) APIs.
- Ensured consistent rendering of AEM-authored experiences across desktop and mobile platforms.
- Implemented complex UI functionality such as conditional rendering, dynamic data binding, and user interaction handling based on API response and configurations.
- Built responsive, dynamic components based on Figma designs by consuming structured content from AEM, ensuring design accuracy and performance across all devices.

Projects: CRY VMS (Volunteer Management System)

- Designed and implemented database schemas to support application requirements, ensuring data normalization, scalability, and optimized query performance.
- Collaborated with cross-functional teams (designers, backend developers, product managers) to gather and define requirements, ensuring alignment on project goals and user needs.

Projects: Nas legal (Law Firm Website)

- Designed and developed a static website for a Law Firm named Naslegal.
- Implemented an inquiry form which sends client queries directly to the firm's email.
- Built using HTML, CSS, JavaScript with focus on a professional and responsive design.
- Helped the firm establish its online presence and made it easier for clients to reach out.

Projects: Caritas India – Volunteer & Event Management System

- Developed a dynamic web application for Caritas India using PHP (CodeIgniter Framework).
 - Implemented user registration, volunteer enrollment, and event management modules.
 - Built using HTML, CSS, JavaScript with focus on a professional and responsive design.
 - Integrated admin panel to manage volunteers, events, and reports.
 - Used MySQL for database management and AJAX/jQuery for smooth interactions.
 - Improved efficiency by reducing manual record-keeping and enabling real-time volunteer tracking.
-
