PROJECTS

Emergency Ambulance Hiring Portal using PHP and MySQL

Emergency Ambulance Hiring Portal using PHP and MySQL is a web based technology which manages ambulance records and request for hiring ambulance data in database and provides rights to update the their details. In this web application ambulance details must be added by admin. This web application provides a way to effectively control record & track the request details of ambulance.

The Emergency Ambulance Hiring Portal is a critical solution planned to streamline and improve the process of requesting and dispatching ambulance services in times of medical emergencies.

Smart Dustbin Using Arduino UNO

- Smart dustbin using an Arduino UNO, ultrasonic sensor and a servo motor
- This project is about a smart dustbin. I decided to make this dustbin to make things easy. When an object is detected the dustbin will open to put the trash

CO- CURRICULAR ACTIVITIES

- Organizing grandest Deepotsav Celebration in Ayodhya
