EDUCATION

Indian Institute Of Technology, Madras

Bachelor of Science in Data Science and Applications

Chennai, TN

Jan. 2021 – May 2025

University Of Calcutta

Bachelor Of Science in Economics

Kolkata, WB

Nov. 2020 – Sept 2023

EXPERIENCE

Data Analyst Trainee

Nov. 2024 – Dec 2024

Axial Health Consultancy Pvt Ltd

Ahmadabad, Gujarat

- Leveraged advanced Excel functions to clean, manipulate, and analyze datasets for insightful reporting.
- Built interactive dashboards and visual reports in Power BI to assist in data-driven decision-making.
- Developed an understanding of data analytics best practices, ensuring actionable business insights.

Teaching Assistant (TA) Intern

July 2024 – Aug 2024

Genwise

MAHE, Karnataka

- Co-taught school students machine learning concepts, algorithms, and introductory neural networks.
- Introduced students to generative AI, exploring foundational ideas and hands-on applications.
- Guided students in practical implementations and projects, fostering a deeper understanding of AI/ML topics.

PROJECTS

Machine Learning - Supervised Regression Problem | *Python, Sci-kit Learn*

June 2023

- * Developed a taxi fare prediction model by implementing pre-processing techniques and performing exploratory data analysis (EDA) to clean and prepare the dataset.
- * Designed and trained six machine learning models to identify the optimal solution for accurate fare prediction.
- * Models used include Linear Regression, Stochastic Gradient Descent (SGD), Decision Tree, Random Forest, XGBoost, and Bagging Regressor.
- * Evaluated the performance of each model using metrics such as Mean Absolute Error (MAE) and Root Mean Square Error (RMSE) to ensure robust predictions.

Machine Learning - Supervised Classification Problem | *Python, TensorFlow, Keras*

May 2018 – May 2024

- * Built a facial expression recognition system capable of classifying images into seven distinct categories, such as happiness, sadness, anger, and surprise.
- * Utilized a Convolutional Neural Network (CNN) algorithm to extract and learn features from facial expressions effectively.
- * Conducted extensive testing and fine-tuning of the CNN model to achieve improved accuracy and minimize classification errors.
- * Created an intuitive visualization of classification results, providing insights into the model's decision-making process.

AI powered Oncology chatbot | *Python, Huggingface, Meditron*

Jan 2025

- * Designed an intelligent chatbot for oncology using Hugging Face's Meditron model to assist patients with cancer-related queries.
- * Implemented NLP techniques for parsing and understanding medical terminologies, providing accurate and empathetic responses to users.
- * Integrated a knowledge base of oncology resources, offering users personalized recommendations and general advice.
- * Conducted usability testing with mock patient interactions to evaluate the chatbot's performance and refine its capabilities.

TECHNICAL SKILLS

Languages: Java, Python, SQL (Postgres), MySQL, JavaScript, HTML/CSS, Bash

Frameworks: Node.js, Flask, VueJS, FastAPI, TensorFlow, Sci-kit Learn

Developer Tools: Git, VS Code

Libraries: pandas, NumPy, Matplotlib, keras
