EDUCATION

Sardar Patel College of Engineering (SPCE), Mumbai

July 2023

Candidate for Bachelor of Technology in Electrical Engineering

CGPA: 8.9/10

Relevant Coursework: Power System Analysis, Project Management, Digital Electronics, Computer Programming, Microcontroller

Higher Secondary School Certificate

June 2018

Secured 85.25% from St. Mary's Junior College, Vashi

Secondary School Certificate

June 2016

Secured 90.85% from St. Mary's Multipurpose High School, Vashi

WORK EXPERIENCE

Axis Bank - Reporting Data Analyst

July 2023 - Present

- Joined as Axis Bank Reporting Analyst in Business Intelligent Unit at Axis Bank and working in Data Compliance department handling the regulatory requirement for the Bank
- Working to implement projects throughout the bank to compliance to the guidelines and requirement of RBI (reserve bank of India)

ACADEMIC PROJECTS

- Working on "Monitoring, control, and maintenance of solar generating systems" to analyze the effects of weather conditions on the productivity of solar panels using data analytics, as a final-year capstone project
- Simulated Load flow analysis of a nine-bus network connected in ring main configuration to perform Power system analysis using the Gauss-Seidel method on Power World Simulator software
- Developed a simulation model on Proteus software to detect overspeeding of vehicles by evaluating the time of crossing at the highway using two Light Detection and Ranging (LiDAR) sensors, an IC-555 timer, and a seven-segment display
- Devised a door-operated automated light switch using an operational amplifier as a comparator and RS flip-flop as a switch on TinkerCad software

INTERNSHIPS

Jawaharlal Nehru Port Trust, Navi Mumbai

August 2021

- Studied operation of 220/33 kV sub-substation to grasp the practical working of components such as lightning arrestor, power transformer, instrumentation transformer, busbar, isolator, overhead lines, insulators, circuit breakers, and capacitor banks
- Monitored metering and indication instruments in the machine house of an electrical load-lifting gantry crane

DP World Terminals, Nhava Sheva

July 2021

- Coordinated with the Planning and Operation department for planning, executing, and monitoring the loading and discharging operations of vessels at the port terminal
- Interacted with the marketing and customer relations team to understand the process of developing and maintaining profitable relationships with key customers and internal stakeholders

ACADEMIC EXPERIENCE

Team Manager – Robotics Club

July 2021 - July

2022

- Designed and manufactured cost-effective customized printed circuit boards to operate manual robot control circuits with Raspberry Pi 4 Model B microcontroller
- Developed and implemented the budget for 2021-2022, acquired and partnered with various sponsors, delegated tasks, managed the performance of 22 team members, and conducted training for new member

Content Writer and Social Media Manager - Internship Cell

Sept 2020 - July

2022

- Documented articles and collaboration letters for the Internship cell website, hosted alumni discussion interviews
- Managed and controlled the LinkedIn page of Internship Cell by weekly posting career resources and internships updates

TECHNICAL SKILLS

- Software: Power BI, Tableau, Oracle, Jupyter Hub, Big Data, AutoCAD, MATLAB, Power World, LTSPICE, EAGEL, Proteus, TinkerCAD, Microsoft Word
- Programming Languages: C++, SQL, PySpark
- Certifications: Value-added course on Financial Literacy at SPCE, Basics of Digital Marketing - Swayam NPTEL
- Coursera Courses :

EXTRA-CURRICULAR

- Serving as Training and Placement coordinator for 2022-23 to conduct placement drives, organize events and act as a liaison between the placement cell and students

- Participated in the National Level Robotics Competition ABU-ROBOCON 2022 held at IIT Delhi and developed manual robots controlled by PlayStation 4
- Won 'Circuit Verse' competition in a team of four at SPECTRA in March-2022, wherein we designed a smart cost-effective sanitizer dispenser machine on Proteus software using proximity sensors, transistors, resistors, DC pump and battery
- Spearheaded Literature team at SPACE, an annual cultural festival at SPCE in March-2021 for three major events such as English Debate, Marathi Debate, and Rhyme & Reason
- Organized 'Technical Paper Presentation' event for 22 teams at SPECTRA, an annual technical festival at SPCE in Feb-2021
- Conducted and hosted an intra-college 'SPCE Annual Debate' first time on a digital platform in Oct-2020 to boost student engagement during the challenging times of COVID-19 with 16 teams participating from Maharashtra
