EXPERIENCE

Dell Technologies

Aug 2021 – Oct 2024

Software Engineer 2 & 1

Bangalore

- Led APJ incident response team for Dell's Global Finance applications, ensuring 99.9% uptime, especially during Black Friday events with 10x normal transaction volumes. Implemented root cause analysis processes that reduced recurring critical incidents by 25%.
- Designed and delivered a vendor invoice management web application for Dell's Finance team using ReactJS and Node.js with a MongoDB database. The application streamlined invoice processing workflows, integrated with existing financial systems, and optimized vendor payment tracking. This solution accelerated processing time by 30% and served both internal finance team members and external vendors.
- Engineered Splunk dashboards that reduced MTTR by 30% across 15+ critical finance applications. Integrated Dynatrace and Zabbix monitoring, improving system efficiency by 15% and accelerating issue resolution by 12%.
- Spearheaded continuous improvement initiatives using SRE principles, building Rundeck and Ansible automation scripts that eliminated repetitive tasks and enhanced system reliability by 20%. This automation expedited deployments and minimized maintenance overhead across multiple environments.
- Mentored over 10 engineers, accelerating team integration and fostering quicker onboarding
- Supported critical enterprise systems including EPM Suite, Oracle DRM, and Thomson Reuters Tax Determination solutions. Specialized in troubleshooting issues across WebLogic application servers, PL/SQL databases, Windows Server environments, Linux, and proprietary Revenue and Treasury platforms.

Dell Technologies

(7 months) May 2020 – July 2020 & Feb 2021 – May 2021

SDE Summer & Winter Intern

Bangalore

- Architected and implemented a robust security compliance system using ASP.NET Core, C#, and MongoDB that automatically identified password expiration issues for 5,000+ users, reducing potential security vulnerabilities by 30% and strengthening Dell's enterprise-wide security posture.
- Designed intuitive front-end components using Razor Pages, Bootstrap, and jQuery for user notifications and alert systems, implementing responsive layouts and custom CSS animations that improved the user experience and ensured timely password updates, leading to streamlined operations and enhanced security management.
- Developed a dynamic Workday dashboard using ASP.NET to track performance and usage of an internal employee management application, automating processes that eliminated manual effort. This enhancement provided real-time visibility into task completion rates and improved application uptime by 15%.

GetMyUni

July 2019 — Aug 2019

Content Marketing & SEO Intern

Bangalore

- Revamped admission pages for 30+ universities, optimizing content and user experience, driving a 20% increase in organic traffic and a 15% boost in average time spent on the GetMyUni website.
- Utilized SEO analytics tools (Search Console, Google Analytics, Semrush) to identify trends, monitor performance, and execute strategies that amplified online presence and user engagement.

IEEE Suez University Student Branch (AIESEC)

June 2018 — July 2018

Web Development Intern

Suez, Egypt

- Built an interactive student database system with gamified reward mechanics for Suez University Student Branch using JavaScript, HTML5, and Bootstrap, resulting in increased user engagement and ensuring responsive design.

EDUCATION

International Institute of Information Technology, Bhubaneswar

Bhubaneswar, India

Bachelor of Technology in Computer Engineering, CGPA 8.08

Aug 2017 - May 2021

TECHNICAL SKILLS

Languages: JavaScript, Python, C, C++, R, Java, C#

Web Development: ExpressJS, Node.js, MongoDB, React, HTML, CSS, TailwindCSS, ASP.NET, MySQL, Machine Learning, Flask
