Projects

- **Net.AI** : Implemented a machine learning model for real-time network traffic analysis, identifying potential threats and improving network performance.
- **LunarLand** : Created an AI agent that mastered lunar landing in the Atari environment, demonstrating proficiency in reinforcement learning and control systems, and thus Implemented a deep reinforcement learning model for lunar lander control within the Atari 2600 environment, optimizing landing precision
- **BioPellet** : Technical help on website development for a biopellet plant, ensuring seamless integration of content and functionality to improve customer engagement.
- **Water.DRIE** : Created a predictive model that uses time series analysis to predict future water levels, and indicate when a water body will dry up.

Electronic Arts Software Engineering virtual experience program on Forage - January 2025

- Proposed a new feature for the EA Sports College Football and wrote a Feature Proposal describing it to other stakeholders.
- Built a class diagram and created a header file in C++ with class definitions for each object.
- Patched a bugfix and optimized the EA Sports College Football codebase by implementing an improved data structure.

Skills

- Programming Languages : Python, JavaScript, C, C++, Java, C#
- Frontend Technologies : ReactJS, HTML, CSS, Redux, NextJS, React Native, Bootstrap
- Backend/DevOps : NodeJS, ExpressJS, PostgreSQL, MongoDB, Firebase, AWS, Azure, Docker, Kubernetes
- Other tools and technologies: Typescript, Git, Postman, Linux, Webflow, Canva
- Artificial Intelligence tools : Blackbox, ChatGPT, Gemini, Perplexity, DALL-E, Claude, Ollama, Copilot, Gamma

Education and Training

Expected in 05/2027

SRMIST KTR

Kattankulathur, Chengalpattu, Tamil Nadu, India

Bachelors in Technology: Computer Science

Certifications

- Recipient of General Proficiency from Hiranandani Foundation School, Thane
- Qualified for Smart India Hackathon 2023
