## Academic Details

### Bachelor of Technology (B. Tech) Computer Science Engineering (2023-2027)

I.I.L.M University, Greater Noida;

CGPA: 8.62

### 12th (High School Certification)

#### CBSE Board

Percentage: 76% (2024)

### 10th (Secondary School Certification)

#### CBSE Board

Percentage: 80.6% (2022)

## Technical Skills

### Programming Language:

Python, C

### Development & Frameworks:

HTML, CSS

### Version Control:

GitHub, Git

### Additional skills:

Problem Solving, Team Collaboration

### Additional Expertise:

Prompt Engineering

### Operating System:

Linux, Windows

## Core Competencies

Problem Solving

Artificial Intelligence

Team working

## Personal Details

**Date of Birth:** 12<sup>th</sup> May 2006

**Languages Known:** English, Hindi

**Address:** Lucknow, Uttar Pradesh

## Profile Summary

Motivated and detail-oriented tech enthusiast with a solid foundation in programming and web development. Proficient in Python and C, with hands-on experience in HTML and CSS for front-end design. Known for quick problem-solving and creative thinking in coding environments. Actively participated in hackathons, demonstrating teamwork, adaptability, and the ability to develop efficient solutions under pressure. Passionate about building responsive and user-friendly applications while continuously learning and implementing modern development practices.

## Work Experience

### Hackathon Developer – Accessibility Tech Software Project

*Self-initiated / Hackathon Participant*

Participated in a 24-hour hackathon focused on **accessibility in technology**.

Collaborated with a team of developers to build a software tool that improves **digital access for users with visual impairments**, using Python and web technologies.

### Front-End Developer – Amazon Clone Project

*Self-Project*

**Duration:** [Month, Year – e.g., Feb 2025]

- Designed and developed a **fully responsive front-end clone of Amazon** using **HTML and CSS**, replicating the structure and layout of the e-commerce giant's homepage.
- Implemented product sections, navigation bar, banners, footer, and responsive design for mobile devices.

## Projects

### 1. Amazon Front-End Clone

- Created a visually accurate and responsive clone of Amazon's homepage using HTML and CSS.
- Emulated navigation menus, product showcases, and interactive elements.
- Designed for both desktop and mobile responsiveness using media queries and layout strategies.

### 2. Accessible Tech Software – Hackathon Project

- Built a web tool aimed at improving accessibility for visually impaired users.
- Focused on screen reader integration, high-contrast UI modes, and keyboard-friendly navigation.
- Worked as part of a cross-functional team during a 24-hour hackathon challenge.

## Certifications

- Hackathon – 01/03/2025**
