PROFESSIONAL SUMMARY

Detail-oriented and intellectually curious professional with a strong academic foundation in economics and hands-on experience in global compliance and regulatory frameworks. Currently driving analytical excellence at EY, where precision, pattern recognition, and critical inquiry are essential. Passionate about exploring the intersection of theory and real-world application, with a growing body of independent research focused on complex economic systems. Adept at synthesizing large datasets, formulating hypotheses, and presenting insights with clarity and nuance. Looking ahead to doctoral research abroad to contribute original perspectives to the evolving landscape of economic thought. Known for a rare blend of analytical rigor, research tenacity, and a reflective mindset shaped by both industry practice and academic inquiry.

Key Skills:

- **Economic Research & Analysis** – Skilled in designing research frameworks, formulating economic hypotheses, and interpreting complex macro and microeconomic data.
- **Quantitative Methods** – Proficient in statistical modeling, econometrics, and data visualization for empirical analysis and policy evaluation.
- **Regulatory Compliance & Risk Assessment** – In-depth understanding of AML, KYC, and financial compliance standards through professional experience at a Big Four firm.
- **Data Interpretation & Synthesis** – Ability to derive meaningful insights from large, multidimensional datasets; experienced in using tools such as R, STATA, and Excel.
- **Academic Writing & Critical Thinking** – Experienced in drafting literature reviews, research papers, and analytical reports with a scholarly tone and logical depth.
- **Global Outlook & Research Orientation** – Actively pursuing international academic engagement, driven by a vision to contribute to global economic discourse through doctoral research.

EXPERIENCE

Fraud Analyst

AML Rightsource | January 2024 – December 2024

- ❖ Investigate customer transactions and conduct ongoing monitoring of alerted activities to detect potential fraud and financial crimes.
- ❖ Collaborate with one of the largest banking clients to perform comprehensive KYC verification of newly onboarded customers, ensuring adherence to regulatory requirements.
- ❖ Execute periodic KYC refresh processes for existing customers, maintaining updated and accurate customer profiles.
- ❖ Analyse suspicious transaction alerts and escalate cases for further investigation when necessary, ensuring timely identification and reporting of high-risk activities.

Compliance Analyst

Ernst & Young (EY) | January 2025 – Present

- ❖ Currently engaged in financial crime compliance and risk advisory for a US-based global bank operating in the APAC region.
- ❖ Supporting transaction monitoring reviews, alert investigations, and case documentation in alignment with AML regulatory standards.
- ❖ Collaborating on a fintech-focused skilling project aimed at enhancing risk mitigation strategies and improving transaction surveillance models.
- ❖ Leveraging analytical tools and domain expertise to identify suspicious patterns and ensure adherence to global compliance protocols.
- ❖ Contributing to client-focused deliverables, drawing from both regulatory knowledge and data-driven insight to strengthen control environments.

PROJECTS/ RESEARCH

1. Effects of New Economic Policy and Income Disparity in India

Independent Research

A critical investigation into how India's liberalization policies have influenced income distribution across various socio-economic groups. This study examines structural shifts in employment, sectoral growth, and wealth accumulation patterns, highlighting the growing divergence between rural and urban income trends in the post-reform era.

2. Impact of Pricing and Branding on Consumer Behaviour in the Post-COVID Economy

Academic Research

Explores the evolving psychology of consumer decision-making in the wake of the pandemic, focusing on how perceptions of value, brand trust, and affordability redefined market dynamics. The study integrates behavioural economics with marketing analytics to understand shifts in purchasing patterns across digital and traditional platforms.

3. Impacts of COVID-19 on Global Poverty and Food Security

Academic Research

This research explores how the pandemic exposed and deepened existing global inequalities—particularly in access to food, employment, and social support systems. It critically assesses economic disruptions across developing regions and their ripple effects on household resilience and food supply chains. The project reflects my deep interest in crisis economics and my commitment to connecting macroeconomic theory with humanitarian realities.

EDUCATION AND QUALIFICATION

- ❖ Auxilium Convent School, ICSE
2004-2016, 81.2%
- ❖ Auxilium Convent School, ISC
2016-2018, 86.75%
- ❖ Bachelor of Science, Quantitative Economics
2018-2021, Amity University, CGPA- 8.75
- ❖ Master of Science, Quantitative Economics
2021-2023, Amity University, CGPA- 9.40

CERTIFICATIONS

- ❖ AML & KYC Compliance issued by Udemey
- ❖ Anti-Money Laundering Business Risk Assessment issued by Udemey
- ❖ Foreign Business Language, German issued by Amity University

EXTRACURRICULAR ACTIVITIES

INDIAN CANCER RESEARCH SOCIETY: During my time volunteering with the Indian Cancer Research Society in collaboration with Annyaman, a theatrical society, I actively participated in campaigns aimed at raising awareness about AIDS and Cancer. Through this meaningful initiative, we used the powerful medium of theater to convey crucial information to the public. It was a rewarding experience, as it allowed me to contribute to vital health causes while fostering a deeper understanding of the importance of early detection and prevention in the fight against these diseases.

HIJLI INSPIRATION: Actively contributed to grassroots initiatives focused on education, health awareness, and socio-economic upliftment in underprivileged communities. Played a key role in organizing learning drives, distributing essential resources, and facilitating interactive sessions for children and women. The experience nurtured empathy, leadership, and a deepened understanding of developmental economics beyond textbooks—fueling both personal growth and academic curiosity.
