SUMMARY

Enthusiastic and motivated BTech student at SRM Institute of Science and Technology (SRMIST), passionate about international relations, public policy, and social impact. A quick learner with strong problem-solving skills, excellent communication abilities, and a proactive approach to learning and collaboration. Seeking an opportunity to intern with a dynamic NGO to gain hands-on experience, contribute meaningfully to impactful projects, and further develop research, analytical, and organizational skills. Committed to continuous growth, adaptability, and making a positive difference within diverse teams and communities.

EDUCATION

SRM Institute of Science and Technology	2023 - 2027
BTech • 8.6 (upto 3rd sem)	kattankulathur, chennai

HOBBIES

- Reading
- Writing
- Editing

SKILLS

- c
- c++
- python
- java

PROJECTS

Online retail store management

- Developed a **Java-based** platform for **sales tracking, inventory monitoring, and order processing**, ensuring efficient retail operations.
- Built using **JavaFX for desktop** and **JSP for web**, with **MySQL database integration**, providing a seamless and data-driven experience for users.
- Implemented **real-time inventory updates, automated order management, sales reporting, and user authentication**, ensuring smooth business operations.

SwiftRide

- Developed a Java & MySQL-based platform enabling secure user authentication, role-based dashboards (Admin, Driver, Passenger), and real-time ride booking and management.
- Built with **JavaFX for desktop** and **JSP/HTML/CSS/JavaScript for web**, powered by **Spring Boot, Hibernate, and MySQL**, ensuring efficient database management and seamless backend communication.
- Implemented secure **payment gateway integration**, automated invoicing, real-time ride status updates, dynamic ride search, and notifications for booking confirmations and ride changes.

BioJ- a sequence alignment tool

- A Java-based sequence similarity and identity tool that enhances an existing GitHub project.
- **Implemented core functionalities** that allow users to access and manipulate biological sequences, perform genetic data analysis, and utilize BioJava's robust toolset for computational biology.
- **Optimized data handling and performance**, enabling efficient processing of large biological datasets through BioJava's API.
- **Focused on usability and scalability**, making the platform adaptable for researchers, students, and professionals working in bioinformatics.
