Profile

An Engineering student aspiring to be a cyber security engineer in future. I'm committed to learning how to protect and secure digital environments. Skilled in Python basics and have studied C/C++ basics. Currently gaining knowledge on Networking.

Projects

MEDITIPS HAND GLOVES PROJECT | HARDWARE MODELLING AND RESEARCH

- Smart wearable: developed a medical glove with embedded sensors for real-time monitoring of heart rate, blood pressure, oxygen saturation, and temperature.
- Ai-powered & wireless: processes data using an embedded microcontroller and transmits it wirelessly to hospitals for remote medical assistance.
- Enhanced emergency care: enables rapid response, reduces misdiagnosis, and improves efficiency by replacing multiple separate monitoring devices.
- Patent published: recognized innovation under the Indian patent office, targeting hospitals, Ems providers, and telemedicine platforms.

OBSTACLE AVOIDANCE VEHICLE | PROGRAMMER

- Developed an autonomous vehicle using Arduino Uno and a motor shield driver to navigate obstacles.
- Integrated ultrasonic sensors for real-time distance measurement and collision avoidance.
- Implemented motor control algorithms to enable smooth movement and obstacle detection.
- Demonstrated the project at an expo, receiving positive feedback for innovation and design.
- Showcased expertise in embedded systems, robotics, and IoT applications.

AES ENCRYPTION TEXT EXCHANGING WEBSITE | BACKEND DEVELOPER

- Developed a secure web-based application for exchanging text messages using AES encryption to ensure data confidentiality and integrity.
- Implemented in Java, hosted on Apache Tomcat with MySQL as the backend for secure data storage.
- Encryption Process: Messages are encrypted with a unique AES key and stored in byte format along with metadata (username, timestamp, and one-time access password).
- Decryption Process: Users enter credentials to retrieve and decrypt messages, after which they are permanently deleted for enhanced security.

Education

B-TECH IN CSE WITH SPECIALIZATION IN CYBER SECURITY | SRM INSTITUTE OF SCIENCE AND TECHNOLOGY, KATTANKULATHUR | 2023-2027

Skills & Abilities

- Project Management
- Research
- Teamwork
- Python
- Fusion360 (3D modelling)C/C++
- Data Structures
- Cryptography

Certifications

- C Programming For Beginners
- Beginning C++ Programming
- Data Structures and Algorithms
- Basics of "Remote Sensing, Geographical Information System and Global Navigation Satellite System
- Divide and Conquer, Sorting and Searching, and Randomized Algorithms
- Introduction to Cybersecurity Tools & Cyberattacks
-
