EDUCATION

Dwarkadas J Sanghvi College of Engineering

Bachelor of Technology in Electronics and Telecommunication

Vileparle, Mumbai

Dec-2021 – May 2025

EXPERIENCE

Research Intern

Feb 2025 – Aug 2025

VJTI, CoE – Complex and Nonlinear Dynamics Lab

Mumbai, India

- Built a Python CLI tool for APK analysis, reducing manual review by 70% and scaling to 200+ apps/week.
- Developed modules in Python, Go, and Java for decompilation, CFG extraction, and obfuscation detection.
- Benchmarked tools like JADX, boosting parsing speed by 30% and detection rates by 25%.
- Analyzed 50+ malware samples, uncovering obfuscation tactics and contributing 3 technical reports.
- Mapped malware behavior to MITRE ATT&CK techniques, aiding threat classification and enhancing report quality.

Placement Coordinator

June 2024 – Present

Dwarkadas J. Sanghvi College of Engineering

Mumbai, India

- Manage and update the placement calendar, clear communication of deadlines, test dates, and interview schedules to 500+ students.
- Organize and conduct targeted skill-development workshops and mock placement drives through collaboration with faculty and alumni mentors.
- Liaise with recruiters and maintain a dynamic database of company profiles and contacts to secure on-campus and virtual placement opportunities.

TECHNICAL PROJECTS

MutAIon-Genomic AI Studio | *Next.js, TypeScript, TailwindCSS, FastAPI, Evo2 LLM*

[Demo](#) | [Code](#)

- Built a full-stack variant effect prediction web app for Single Nucleotide Variant(SNV) using Evo2 LLM and Python backend deployed on Modal's H100 serverless GPU.
- Designed an interactive genome viewer allowing users to select genome assemblies, explore genes like breast cancer gene, and view reference sequences.
- Integrated mutation input with real-time AI pathogenicity prediction and ClinVar comparison, using FastAPI backend via a secure API endpoint.
- Developed a responsive and accessible frontend using the T3 Stack

Moniq | *NextJS, React, TailwindCSS, PostgreSQL, Gemini API*

[Website](#) | [Code](#)

- Built a full-stack finance platform using Next.js, Supabase, and Prisma to manage monthly transactions.
- Used Gemini AI for predictive analytics, providing personalized financial insights with 85% confidence from monthly expense data.
- Created real-time, filterable dashboards with pie, bar, and line charts using Shadcn UI and Tailwind CSS.
- Implemented async workflows via Inngeist and email alerts via Resend, ensuring >99.9% uptime for user notifications.

SecDroid - OWASP MASVS Static Analyzer | *Python, JADX, dex2jar*

[Code](#)

- Developed SecDroid, a Python CLI tool that automates APK decompilation and MASVS-based static analysis for 100+ APKs per day.
- Designed a JSON-driven rule engine using regex and file-type filters to detect 20+ custom security issues beyond MASVS.
- Implemented integrity checks using MD5/SHA256 hashes to flag tampered APKs and cut false positives by 30%.

ACHIEVEMENTS & AWARDS

- **LeetCode Elite Performer (Top 0.1%)** : Achieved a guardian-level rating of 2655 on LeetCode, securing top global weekly contest placements: 2nd, 10th, 14th, and 16th out of over 200,000 participants.
- **TryHackMe Top 0.1% (Cybersecurity Challenges)** : Completed over 250 hands-on labs and CTF-style challenges on TryHackMe, ranking 3rd globally on the February 2025 leaderboard and maintaining a top-0.1% standing among 1 million+ learners.
- **IEEE YESIST12 Competition**(Certificate): Awarded 2nd Prize for innovative project development at the IEEE YESIST12 student innovation competition, demonstrating strong problem-solving and teamwork skills.
- **Technical Speaker & Workshop Leader**: Delivered a hands-on KiCad workshop at MumbaiFOSS 2025 by Free Open Source System(FOSS) and served as a guest speaker at SIGCE College, covering topics of EDA tools for designing, automated circuit design with custom scripts, and open-source collaboration.
- **Academic Excellence**: (Certificate) Graduated with 1st rank in the Secondary School Certificate (SSC) examinations in school

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, TypeScript, Golang

Frameworks:Next.js, React.js, Vite

Backend: NodeJS, Flask. Supabase, Inngest, PostgreSQL

AI and ML: Tensorflow, Pytorch **Dev Tools**: VSCode, Kali Linux, Git/Github, Jupyter Notebook, Google Colab, Selenium
