

ABOUT ME

I am an enthusiastic IT student driven by curiosity and a passion for continuous learning in the ever-evolving tech landscape. With hands-on experience in various programming languages and frameworks, I thrive on solving real-world problems, whether coding a new app or designing user-friendly interfaces. I believe technology should be functional, accessible, and enjoyable, and I actively seek opportunities to enhance my skills through personal projects and online courses. Outside of my studies, I enjoy participating in hackathons, contributing to open-source projects, and staying updated on industry trends, all while aiming to create impactful solutions that improve everyday life.
