EDUCATION

SRM Institute Of Science and Technology

Bachelors of Technology in Computer Science | 9.2 GPA

Expected Graduation: Aug 2027

SKILLS

Languages Python SQL

Software AWS · Excel · PowerBI · Google Sheets · MySQL · Git · Github

EXPERIENCE

Data Analyst Intern

CodSoft

Sep 2024 – Jan 2025

Remote

- **Conducted in-depth Exploratory Data Analysis (EDA)** on large-scale sales datasets to identify trends, seasonal patterns, and anomalies impacting business performance.
- **Utilized tools like Excel and Python (pandas, matplotlib, seaborn)** to clean, transform, and visualize sales data for deeper insights and stakeholder reporting.
- **Derived actionable insights**, such as identifying top-performing products, underperforming regions, and customer buying patterns, contributing to improved inventory and marketing strategies.
- **Presented data-driven recommendations** to the team through visual dashboards and summary reports, supporting strategic decision-making and revenue optimization.

PROJECTS

Salary Dashboard - [GitHub Link](#)

Apr 2025

Data Science Job Salaries - Bar Chart

-  **Excel Features:** Utilized bar chart feature (with formatted salary values) and optimized layout for clarity.
-  **Design Choice:** Horizontal bar chart for visual comparison of median salaries.
-  **Data Organization:** Sorted job titles by descending salary for improved readability.
-  **Insights Gained:** This enables quick identification of salary trends, noting that Senior roles and Engineers are higher-paying than Analyst roles.

Country Median Salaries - Map Chart

-  **Excel Features:** Utilized Excel's map chart feature to plot median salaries globally.
-  **Design Choice:** Color-coded map to visually differentiate salary levels across regions.
-  **Data Representation:** Plotted median salary for each country with available data.
-  **Visual Enhancement:** Improved readability and immediate understanding of geographic salary trends.
-  **Insights Gained:** Enables quick grasp of global salary disparities and highlights high/low salary regions.

Formulas and Functions

-  **Multi-Criteria Filtering:** Checks job title, country, schedule type, and excludes blank salaries.
-  **Array Formula:** Utilizes MEDIAN() function with nested IF() statement to analyse an array.
-  **Tailored Insights:** Provides specific salary information for job titles, regions, and schedule types.
-  **Formula Purpose:** This formula populates the table below, returning the median salary based on job title, country, and type specified.
