Core Skills : Statistics, Data Visualization, Data Cleaning, Data Interpretation, KPI Development, Data Modelling and Forecasting, Data automation with CHATGPT, Power Query and Manipulation, , and Creating Dashboards

Oriented Roles : As Data Analyst, Business Analyst, Reporting, Story Telling of Data Insights, Risk Analyst, Operation Analyst, Project Analyst, Financial Analyst

PROJECTS & ACTIVITY [[GITHUB](#)]

Credit Card Analysis – Banking Domain [Power BI [Presentation Link](#)]

- Analyzed data for Mitron Bank's new credit card launch, focusing on customer preferences and behaviors.
- Identified key customer segments and spending patterns for targeted marketing strategies.
- Created a Power BI dashboard to segment customers by age, income, and spending habits.
- Strategically increased spending by **15%** in the 25-34 age group and enhanced engagement by **10%** among IT professionals, driving significant revenue growth.

Sales Insights – Brick & mortar business [Power BI | SQL [Presentation Link](#)]

- Created an automated dashboard for a computer hardware business facing challenges in scaling within a dynamically changing market and lacking actionable insights.
- Performed data analysis using SQL and Power BI to track revenue growth, year-over-year (YOY) trends, and region-wise sales performance.
- The dashboard enabled quick, data-informed decisions, effectively displaying sales trends and potentially raising revenue by at least **7%** in the next quarter.

HR Data analytics – HR Domain [Power BI | Excel] [Presentation Link](#)

- A Power BI dashboard to track employee data for the HR team, including working hours, attendance, performance, and leaves. The dashboard streamlined HR processes and increased efficiency.
- This Designed Dashboard can save 3-4hrs of work for the HR daily.

EXCEL TUTORIAL AS Formal Project -
