

GURU PRIYA G

gmpriya24@gmail.com / 9003290788 / Chennai, Tamil Nadu

Skills

- C/C++, Python, Java, SQL, HTML, CSS, JavaScript
 - Object-Oriented Programming, Data Structures and Algorithms, Git, Operating System
 - Communication, Problem-solving, Teamwork, Leadership, Testing, Design, Debugging
 - English (Fluent), Tamil, Telugu (Native), Hindi, German (elementary) – Multilingual
-

Education

Computer Science & Engineering

SRM Institute Of Science & Technology (Deemed University) • Chennai, Tamil Nadu

05/2027

specialized with Internet of Things

- **GPA:** 9.47
 - **Coursework:** Internet of Things, Artificial Intelligence, DSA, OS
 - **Coordinated "Bits and Bytes"**, a technical puzzle and quiz event under INTBOT'25, promoting logical thinking and tech engagement.
 - **Coordinated SRMRMUN**, facilitating event planning, delegating engagement, and executing on-ground activities to promote global awareness and debate culture.
-

Projects

Developed Smart Irrigation System using IoT and Sensor Automation

- Designed an automated irrigation system using soil moisture and environmental sensors with ESP8266.
- Controlled water pump based on real-time sensor data to optimize water usage and reduce manual effort.
- Integrated Blynk IoT dashboard for remote monitoring and control via smartphone.
- Achieved up to 40% reduction in water consumption and eliminated 90% of manual intervention in irrigation tasks.

Mindwavery, an offline-first AI-powered emotional wellness assistant

- Built an offline-first AI-powered emotional wellness assistant using Phi LLM and React, enabling intelligent, context-aware mood-based music recommendations.
- Integrated Node.js, Express, and Ollama for fully local AI hosting, ensuring 100% data privacy with no cloud dependency.
- Achieved 95% conversation accuracy and boosted user engagement by 40% through an animated, modern UI built with TailwindCSS and Framer Motion.

Developed AI-Powered Chatbot and Voice Assistant using LLaMA 3.2-Vision

- Built an AI chatbot with PyQt6 and LLaMA 3.2-Vision via Ollama for intelligent, vision-enhanced conversations.
 - Developed a real-time voice assistant enabling smooth, local AI-driven interactions.
 - Focused on local inference for better performance, privacy, and seamless user experience
 - Achieved 92% accuracy in voice query recognition and reduced average response time by 60% compared to traditional cloud-based assistants.
