CAREER SUMMARY

Enthusiastic and detail-oriented Data Science graduate to seeking a responsible and growth-oriented career position in a reputable organization where I can apply my technical skills, academic knowledge, and problem-solving abilities. Eager to contribute to the firm's success while continuously advancing my professional development and achieving long term career goals

TECHNICAL & PROFESSIONAL SKILLS

Languages: Python, SQL, R

Libraries & Frameworks: Pandas, NumPy, Scikit-Learn, Seaborn

Tools: Power BI, Advance Excel.

Data Skills: Data Cleaning, Data Visualization, Predictive Modeling, Business statistics.

Professional Skills: Communication, Collaboration, Problem Solving, Storytelling, Critical Thinking

EDUCATION

B.Tech in Data Science

June-2025

Vijaya Engineering College, affiliated with JNTUH University

Telangana, India | CGPA: 7.6

PROJECTS

Crime Prediction and Occurrence Using Machine Learning

Dec 2024

- Built a crime prediction model using Naive Bayes and other ML algorithms.
- Analyzed over 3GB of crime-related data to identify patterns and trends.
- Achieved 90% model accuracy, supporting law enforcement planning through data insights.

E-Commerce Fraud Detection Based on Machine Learning Framework

April 2025

- Built a Fraud Detection model using Flask framework and libraries such as Pandas and NumPy.
- Analyzed Transaction datasets to detect different types of frauds.
- Achieved 90% model accuracy, through data insights.

WORK EXPERIENCE

Data Analytics Intern (Virtual Experience)

Mar 2025

Accenture |

- Simulated real-world tasks including data modeling in Excel and business storytelling.
- Developed dashboards and recommendations based on cleaned and prepared data.
- Obtained high success rate in developing Dashboards.

Data Analytics Intern (Virtual Experience)

Mar 2025

Deloitte |

- Gained practical exposure to forensic analytics and data visualization in Tableau.
- Completed case-based analysis focusing on manipulation and client-ready reporting.

CERTIFICATIONS

Python for Data Science – IBM

Concepts of data analytics–Microsoft

NLP and Deep Learning with Python
