PROJECTS / OPEN-SOURCE

LivablePro | **Link**

Python

An ML-powered dashboard ranking 188 countries based on livability factors, integrating sentiment analysis from Reddit discussions. Provides real-time insights on healthcare, economy, and environment using GPT-based NLP, with an interactive Streamlit UI for policymakers.

Walmart Sales Analysis | **Link**

PowerBI, Excel

This project aims to explore the Walmart Sales data to understand top performing branches and products, sales trend of different products, customer behaviour. The aim is to study how sales strategies can be improved and optimized. The dataset was obtained from the Kaggle Walmart Sales Forecasting Competition.
