

SOCIAL ENDEAVOURS

In December 2022, I actively participated in two impactful initiatives under the banner of CRY (Child Rights and You) at SRCC (Shri Ram College of Commerce). Firstly, I volunteered for the "Bake for CRY" Sale, a collaborative effort with five prominent bakeries across the Delhi NCR region. Through this partnership, we orchestrated cooperative endeavours aimed at enhancing the quality of life for underprivileged children. By leveraging resources and networks, we organized fundraising activities to support various programs and interventions benefiting vulnerable youth.

Additionally, I contributed my time and effort to the Gazipur Project, a concerted effort by CRY in collaboration with SRCC. This project focused on providing vital support to the children of Ghazipur, encompassing the distribution of nutrition kits, facilitation of essential healthcare services, and provision of educational resources. By engaging in this endeavour, we aimed to address multifaceted challenges faced by children in marginalized communities, striving to ensure their holistic well-being and fostering avenues for their growth and development.

Through these experiences, I gained valuable insights into the significance of grassroots initiatives and collaborative endeavours in effecting positive social change.

rsity

EXTRA CURRICULAR ACTIVITIES

Research

Wrote a research article on “India’s Economic Recession in 2008” emphasising on Fiscal and Monetary policies, in 2023:
The 2008 global economic recession had profound impacts on India's economy, leading to significant contractions in growth and employment. This article explores the fiscal and monetary policies implemented by the Indian government in response to the crisis, comparing them to measures adopted during the 2023 economic landscape. In 2008, expansionary fiscal policies, including increased public spending and tax cuts, alongside accommodative monetary policies, such as interest rate reductions and liquidity support, played crucial roles in stabilizing the economy. The 2023 policies reflect lessons learned, focusing on sustainable growth, digital economy advancements, and resilience-building to mitigate future economic shocks.

Wrote a research article on “G20 and its impact on Indian economy”, in 2023:
This research article examines the impact of the G20 on the Indian economy in 2023, analysing both direct and indirect influences. It explores how India's participation in the G20 has shaped its economic policies, trade relations, and international standing. The article highlights key G20 initiatives, such as infrastructure development, digital transformation, and climate action, and their implications for India's economic growth and sustainability. It also assesses the benefits and challenges of G20 membership for India, providing insights into how global cooperation within the G20 framework has contributed to India's economic resilience and strategic positioning in the global market.

Wrote a research article on prediction of crop yield using regression analysis, in 2024:
The state of Haryana is one of the top 10 states in the world. The state's agriculture is dominated by rice, wheat, and sugarcane. The yield of these crops is dependent on several factors, such as weather conditions, depletion of nutrition level of soils, fertilizer availability and cost, pest control, post-harvest loss, and other factors. In this work, regression analysis is used to establish the relationship among these 6 factors and to identify their influence on yield. The most responsible factors for the variation in crop production are uncertainties in the weather conditions and seasonal rainfall policies. The minimum support price (MSP) is crucial for predicting crop yields as it influences farmers' planting decisions, input investments, and risk management strategies. This article attempts to focus

	on forecasting the yield of three major crops grown in Haryana, namely, ‘paddy’, ‘wheat’ and 'sugarcane', through implementing appropriate statistical models, in particular regression and cross-sectional models. Wrote a literature review on “Intrahousehold Bargaining”, in 2025 : A literature review on intrahousehold bargaining explores various theoretical frameworks and empirical studies that analyze how decision-making, resource allocation, and power dynamics operate within households. It critically examines classical unitary and collective models, emphasizing how gender, income control, and cultural norms shape bargaining outcomes. Through this review, the students have demonstrated a clear understanding of development theory as it pertains to household economics, identifying key scholars and debates in the field. The learning outcome reflects their ability to synthesize complex academic material, compare theoretical perspectives, and assess their practical implications for policy and gender equity. <i>After writing an elaborate economic research article, I gained a deeper understanding of the subject matter, refine analytical skills, and enhance critical thinking abilities. It also helped me develop proficiency in conducting research, synthesizing complex information, and presenting findings coherently. Moreover, the process fosters a greater appreciation for academic rigor, fosters intellectual growth, and contributes to the advancement of knowledge in the field.</i>
Skills	<u>Have basic knowledge of “Statistics with R”, under which I have learnt: the following:</u> 1. Introduction to R 2. Data Import and Manipulation 3. Descriptive Statistics 4. Data Visualization 5. Probability Distributions 6. Hypothesis Testing 7. Regression Analysis 8. Statistical Inference 9. Practical Applications <u>Advance spreadsheet tools, under which I have learnt: the following:</u> 1. Advanced Functions: 2. PivotTables 3. Data Validation 4. Conditional Formatting 5. Data Analysis Tools <u>Stata Software, under which I have learnt: the following:</u> 1. Stata Interface 2. Data Management 3. Data Analysis 4. Regression Analysis 5. Graphical Presentation <u>Graphic designing, under which I have learnt: the following:</u> 1. Canva Interface: Familiarize with Canva's layout, templates, and tools. 2. Starting a Design: Begin a project by selecting a template or custom dimensions. 3. Templates and Elements: Explore Canva's library for images, icons, and graphics. 4. Layout Principles: Learn about alignment, spacing, and hierarchy for effective composition. 5. Typography Basics: Understand font selection, size, and styling. 6. Colour Theory: Discover how to use colours to evoke emotions and create impact. 7. Element Manipulation: Add, resize, rotate, and arrange elements within your design.

- 8. **Text Editing:** Utilize formatting options, effects, and arrangement tools for text.
- 9. **Image Editing:** Learn cropping, resizing, adjusting, and filtering for images.
- 10. **Export and Sharing:** Explore download options and direct sharing to social media platforms.
- 11. **Practice and Feedback:** Engage in regular practice and seek feedback for improvement.

Financial literacy, under which I have learnt: the following:

- 1. **Budgeting:** Learn to create and manage personal budgets.
- 2. **Saving and Investing:** Understand various investment options and their risks and returns.
- 3. **Debt Management:** Learn to manage debt responsibly.
- 4. **Financial Planning:** Set financial goals and create plans to achieve them.
- 5. **Risk Management and Insurance:** Understand insurance and its role in managing financial risks.
- 6. **Taxation:** Basics of taxes and strategies for tax planning.
- 7. **Retirement Planning:** Learn about saving for retirement and building a nest egg.
- 8. **Financial Decision Making:** Develop skills to make informed financial decisions.
- 9. **Consumer Awareness:** Understand consumer rights and avoid financial scams.
- 10. **Ethical and Social Responsibility:** Learn about ethical considerations in finance and responsible financial behaviour.

IT skills & Data Analysis, under which I learnt the following:

- 1. **IT Fundamentals:** Introduction to computer basics, including operating systems and file management.
- 2. **Programming Skills:** Learning languages like R, for data manipulation and analysis.
- 3. **Data Analysis Tools:** Familiarization with software like Excel, SPSS, R, or Python libraries for statistical analysis.
- 4. **Data Cleaning:** Techniques for preparing data by handling missing values and outliers.
- 5. **Statistical Analysis:** Learning basic statistical methods for analysing data.
- 6. **Data Visualization:** Understanding how to visually represent data using tools like Tableau or Python libraries.
- 7. **Machine Learning:** Introduction to algorithms for predictive modelling using Python libraries like scikit-learn.
- 8. **Big Data Analytics:** Exploring technologies like Hadoop and Spark for analysing large datasets.
- 9. **Ethical Considerations:** Understanding data privacy, security, and ethical issues related to data analysis.

Digital marketing course by google, under which I learnt the following:

- 1. **SEO (Search Engine Optimization):** Techniques to improve website visibility in search engine results.
- 2. **SEM (Search Engine Marketing):** Creating and managing ads on search engines for targeted exposure.
- 3. **SMM (Social Media Marketing):** Leveraging social platforms for brand promotion and engagement.
- 4. **Content Marketing**
- 5. **Email Marketing**
- 6. **Web Analytics**
- 7. **Online Advertising**
- 8. **Mobile Marketing**
- 9. **Affiliate Marketing**
- 10. **Digital Strategy**

Student societies

CRY Chapter, SRCC

Dec 2022-Aug 2023 (9 months)

Research Wing

Child Rights and You is a top non-profit and non-government organisation in India working towards the upliftment of the underprivileged children of India. Child Rights Chapter, SRCC enable the students to take responsibility for the situation of the deprived Indian child and motivate them to confront the situation through collective action, giving the child & themselves the opportunity to realise their full potential.

From December 2022 to August 2023, as an active member of the Child Rights Chapter at SRCC, I engaged in several initiatives aimed at advocating for the welfare of underprivileged children in India under the auspices of Child Rights and You (CRY). During this period, my contributions included:

- Development of Blogging Strategy:** I formulated an action plan delineating the structure and content flow for the blog section of CRYxSRCC, aligning it with the organization's objectives and target audience. This involved strategizing on topics, tone, and frequency to effectively communicate key messages regarding child rights issues.
- Authoring Blog Content:** I authored a blog addressing the theme "Psychological Consequences of Domestic Abuse on Children," shedding light on the profound impact of domestic violence on the mental and emotional well-being of vulnerable children. Through research and articulation, I aimed to raise awareness and stimulate dialogue on this critical issue.
- Editorial Oversight:** I provided editorial support by editing a blog focused on "Substance Abuse in Children," ensuring clarity, coherence, and adherence to messaging guidelines. By refining the content, I aimed to enhance its readability and effectiveness in conveying essential information about the challenges of substance abuse among children.
- Strategic Input for Website Development:** I actively participated in brainstorming sessions to generate ideas and formulate a plan of action for enhancing the website of CRYxSRCC. This involved proposing features, functionalities, and content strategies to optimize the online platform's effectiveness in engaging stakeholders and amplifying the organization's advocacy efforts.

Through these endeavours, I demonstrated a commitment to leveraging communication channels to raise awareness, advocate for policy changes, and mobilize collective action in support of child rights. My involvement in content creation, editing, and strategic planning underscored my dedication to contributing meaningfully to the mission of CRY and the Child Rights Chapter at SRCC.

OIP (Office of International Programmes)

Position Holder: Junior Executive

The Office of International Programs (OIP) serves as a pivotal platform facilitating collaborative ventures and fostering cooperation in the realms of education, research, and academic pursuits. Through its initiatives, OIP endeavours to cultivate international exchange programs aimed at enriching cross-cultural experiences and nurturing global perspectives among students. By creating, developing, and nurturing such programs, OIP endeavours to establish dialogues and interactions on pressing global issues while simultaneously fostering the talents of students to enable their participation on a global scale.

OIP's initiatives are structured around various thematic areas that encompass contemporary issues pertinent to global discourse. These themes, including "Youth in Action," "Winds of Change," and "Contrasts and Cohesions," provide a framework for in-depth exploration and analysis of diverse topics. To facilitate a comprehensive understanding of these themes, OIP orchestrates a range of activities such as project work, workshops, and lecture sessions. Through these platforms, students engage in extensive research, collaborative projects, and interactive sessions, thereby gaining profound insights into multifaceted global challenges and opportunities.

	The contributions made by students within OIP are manifold. They actively participate in research endeavours, contribute to project development, organize and facilitate workshops, and spearhead initiatives aimed at fostering intercultural understanding and global collaboration. Through their collective efforts, students not only enrich their own academic experiences but also contribute meaningfully to the broader mission of OIP in promoting international cooperation and understanding.
Languages known	- English (Professional level proficiency) - French (Professional level proficiency) - Hindi (Professional level proficiency)
Competitions	I was honoured to secure the 2nd Runner-Up position in the prestigious national-level case competition, "Portfolio Prowess," organized by the esteemed Delhi School of Economics. This competition challenged participants to strategically allocate an imaginary fund of 5 lakh among various asset classes, with a focus on asset allocation, investment rationale, and expected portfolio returns. Emphasizing diversification and alignment with risk tolerance and investment goals, participants were tasked with designing a comprehensive portfolio deck showcasing their strategies. My achievement in securing the 2nd Runner-Up position reflects my ability to effectively design and communicate a robust asset allocation strategy, investment rationale, and risk management approach within the competitive landscape of the competition. Gold medalist in essay writing competition organised by Shikshaya Namah in 2019
Certificate	Google Analytics for Beginners Certificate of Completion <i>From the "Google Analytics for Beginners" course, I gained foundational knowledge of website analytics, including how to set up Google Analytics, track website traffic, analyse audience behaviour, and measure key performance metrics.</i>
