WORK EXPERIENCE

AI/ML & Data Science Intern, Kapidhwaj Innovations Private Limited 05/2025 – 06/2025

- Developed and optimized machine learning models for business applications
- Analyzed datasets to extract insights and support decision making
- Assisted with data preprocessing, feature engineering, and model validation
- Worked with Python, TensorFlow, and scikit-learn to build AI solutions

Brand Marketing Intern, Corizo 07/2025 – Present

- Assisted in planning and executing digital marketing campaigns across platforms like LinkedIn, Instagram, and email newsletters to increase course awareness and enrollment.
- Collaborated with the marketing team to track analytics, optimize campaign performance, and support brand positioning in the ed-tech space.

Fundraising Volunteer, Odisha Development & Management Program Present

- Engaged with potential donors to raise awareness and secure contributions for grassroots development initiatives.
- Contributed to achieving fundraising targets within a short internship span, supporting ODMP's social impact goals.

EDUCATION

B-tech in Artificial Intelligence, Amity University Noida 2023 – Present

- GPA: 7.1
- Working on publishing a research paper on Optimization of various deep learning models for accurate crop disease detection.

PROJECTS

Breast Cancer Prediction with Ensemble ML Models,

Live app demo : <https://breastcancerprediction-ml.streamlit.app>

- A machine learning-powered web app to predict Malignant or Benign breast cancer

Optimization of various Deep Learning Models for accurate Crop Diseases detection under variable lighting Conditions

- Built using state-of-the-art CNN architectures (DenseNet121, ResNet50, MobileNetV2) to identify plant diseases from leaf images.
- Achieved 99.15% accuracy using DenseNet121, with extensive evaluation including confusion matrices and classification reports.
- Looking forward to deploy it.
