

# Naman Kotak

Delhi, India | namankotak@gmail.com | naman-kotak-96992816b | 9039992220

## EXPERIENCES

### Anax Technologies

Full Stack Development Intern

Nagpur, Maharashtra

July 2024 - May 2025

- Collaborated in an **Agile-like environment** with three developers to architect a scalable, maintainable frontend for FJMS, supporting a **50% increase in user traffic** with **no performance degradation**.
- Developed and integrated key features for a government project, including an **appointment booking system (reduced scheduling time by 40%)**, an **e-commerce module**, and a **PDF Kundli builder using mPDF**, supporting **5,000+ downloads**.
- Debugged and optimized backend logic across **30+ modules**, enhancing stability and **reducing errors by 25%**, while managing code via **Git and GitHub** for version control and issue tracking.

### Internure

Marketing Strategist

Greater Noida, Uttar Pradesh

October 2022 - February 2023

- Liaised monetization models, pricing strategies, and user incentives that **improved user retention by 15%**.
- Executed multi-channel marketing campaigns that **boosted brand visibility by 45%** and increased website **traffic by 60%**.

## EDUCATION

### B. Tech CSE'25 | CGPA: 9.7 (Upto 7th Sem)

Bennett University

September 2021 - May 2025

Greater Noida, Uttar Pradesh

### CBSE (Class XII), Aggregate: 95.4%

Delhi Public School

April 2019 - March 2020

Raipur, Chhattisgarh

## PUBLICATIONS

### Saliva-based Blood Glucose Monitoring System using Optimised XGBoost Algorithm:

- 98.67% accuracy; 0.9% higher** than standard model, using a custom-optimized XGBoost algorithm on saliva-based biomarker sensors; presented at **ISDIA-2025 (Hybrid) at the University of Wollongong, Dubai**, in collaboration with Hive Pro.

### Real-Time Speech to Sign Language Translation Using ML & DL:

- 93.4% accuracy** and a **Word Error Rate (WER) of 2.8%** by combining MFCC audio processing, CNN-RNN feature extraction, and ConvLSTM-based Text-to-Sign modules; presented at **ICRITO 2024, Noida (IEEE Conference on Reliability, Infocom Technologies & Optimization)**.

## SOFTWARE ENGINEERING PROJECTS

### Sign Language Translator | Tech Stack: Python, Flutter, Deep Learning, selenium.

- Achieved **99.3% accuracy** in real-time sign language-to-text and speech-to-sign translations, processing **10,000+** gestures and speech patterns.
- Scraped sign language dictionary data using **Selenium**, with **LSTM-based model training** for accurate predictions.

### Assistance In Danger (AID) Maps | Tech Stack: Python, HTML/CSS, Flask

- Achieved route optimization **under 2.5 seconds with 95% API uptime** by integrating **GraphHopper** and **OpenStreetMap APIs**.
- Developed for **real-time emergency service** location access, enhancing ambulance, police, and fire response.

### Career Market Analyser | Tech Stack: Python, HTML/CSS, Flask, selenium

- An **analysis and probabilistic tool** made for smart compatibility analysis of a user with that of a company's criteria.

## SKILLS

- Software Development:** Python, Java, C++, JavaScript, HTML/CSS, ReactJS, Node.js, MongoDB, MySQL, Flutter, Flask.
- Data & Business Analytics:** Advanced **Excel** (VLOOKUP, Pivot Tables, Charts), Basic **SQL** (Joins, Filters), Data Cleaning, Segmentation Analysis, Reporting.
- Project Management:** Software Project Management, Risk Management Awareness, Root Cause Analysis (RCA) Basics.
- Data & AI:** Machine Learning, Deep Learning (CNN, RNN, LSTM), XGBoost.
- Soft Skills:** Leadership, Teamwork, Multi-tasking, Adaptability to GMP and HSE Standards, Communication (**Hindi & English**).

## CERTIFICATIONS

- AWS Academy Graduate - AWS Academy Cloud Foundations.
- Neural Networks and Deep Learning: DeepLearning.AI.
- Introduction to Scrum Master Profession: SkillUp EdTech.
- Using Git for Distributed Development: The Linux Foundation.
