Skills

I am an Intern in MVJ Medical College & Research Hospital, I would love to work as an intern for a month in your Organization,

I possess skills of teaching, video editing, photography, research work, and can also assist in teaching students.

I am okay with both offline or online internship, if offline centers are available in Bangalore,

Experience

I do not have any past experiences, as time did not permit,
Now also since I am an intern if there are programs available on a Sunday, or on weekdays after 5pm I would love to work for it.

I have keen interest in paediatrics and would want to pursue it as a career in my future.,

Therefore I was looking for opportunities which offered Volunteering work associated with children

I am a fast learner, so any work I would learn and do the best up to my abilities,

Thanking you

Education

School : Baldwin Girls High School .

College: Deksha puc College

Medical College: MVJ Medical College & Research Hospital
