SUMMARY

Aspiring Analyst passionate about digital learning, performance support, and data-driven storytelling. Eager to contribute to the creation of engaging learning solutions using tools like Power BI, Excel, and MySQL. Skilled at working on instructional data, developing dashboards, and presenting insights in clear, structured formats.

PROJECT

Power BI Dashboard: Sales & Inventory Management

- Designed an interactive BI dashboard visualizing sales trends, inventory levels, low stock alerts.
- Used Power Query to clean data, applied pivot tables & visual elements like charts and slicers.
- Simulated real-world sales environment for analytical insights.

SQL-Based Student Course Enrollment System

- Created normalized SQL schema for managing student-course enrollments.
- Handled relationships between Students, Courses, and Enrolments with real-time queries.
- Built insights on course popularity and student registrations.
