10th and 12th (2016 - 2019)

PROFILE

I'm a future-focused Communication Designer with a strong foundation in Product and Graphic Design, specializing in User Experience, branding, publication, and packaging. My strengths lie in user-centered research, strategic thinking, and translating concepts into functional, accessible, and visually compelling solutions.

Currently exploring the integration of AI in design, I have hands-on experience with tools like ChatGPT, Perplexity, Firefly, Canva AI, Gemini, Jullius, Napkin AI, and basic knowledge of Midjourney. I use these to enhance ideation, user engagement, and creative workflows.

I'm passionate about using design as a tool for innovation, impact, and solving real-world problems, driven by empathy, research, and a commitment to continuous learning.
