SUMMARY

As a student, I've always believed that design is more than structures; it reflects ambition, culture, and movement. I'm passionate about sustainable architecture, spatial storytelling, and how design influences human behavior. Beyond the classroom, I write articles that explore the intersections of architecture with travel, daily life, and social impact, making complex ideas accessible to everyone.

EXPERIENCE

University

Jan 2023 - Present

- presented a seminar on FRUGALITY and sustainable living to professors and fellow batchmates
