

Aiming to reach out to people through my inner patriotic, sympathetic and empathetic feeling with just the completion of my boards examination I Mauli Shridhar of 17 years old would like to lend her hand to let your hands join in for a bright future India be it for children, teenagers, adolescent, adults or aged.

I have always been admired by paintings, sketches and crafts. Further to not just keep this admiration to myself I would like to share it with people. Additionally I have keen interest in sharing the knowledge I have gained with people especially children and women. I have always been a bright student scoring 90% in 10th icse board examination.

Here I have attached my 3 drawings:
