EXPERIENCE & PROJECTS

Clinical Training – IHSM

2022 MAY

- Completed compulsory traineeship in affiliated hospitals:
- Assisted inpatient & procedural nurses (multiple semesters, 144+ hours)
 - Supported emergency care feldshers & inpatient doctors in patient management
 - Functioned as Family Group Practice (FGP) doctor’s assistant

Selected Projects

- Diabetes Prediction (PySpark MLlib): Preprocessed large healthcare datasets, performed feature engineering, trained and validated classification models for risk stratification.
- Interactive Healthcare Dashboards: Designed dashboards to monitor patient flow, bed occupancy, and KPIs; enabled real-time decision support for administrators.
- Data Wrangling & Risk Adjustment (CMS DE-SynPUF): Cleaned and transformed large claims datasets for provider profiling and safety indicator analysis using SQL and R.

SKILL

- Technical: R, Python, SQL, Google BigQuery, Tableau / Power BI, Excel
- Healthcare / Process: Lean Six Sigma (Y/G Belt), SEMMA, KPI Tracking, Clinical Data Standards
- Soft Skills: Communication, Teamwork, Analytical Thinking, Project Management
