

Anuja Maddala

Data Analyst

Hyderabad | +91-79812 86948 | [LinkedIn](#) | anujamaddala@gmail.com

- **Languages:** Python, Java, C, JavaScript, HTML, CSS
- **Frameworks/Tools:** React.js, Git, Tableau, Power BI
- **Database:** SQL, PL/SQL, Oracle, RDBMS, Data analysis, Data (management, integrity, Visualisation Reporting, audits)
- **Other Skills:** MS Excel, Spreadsheets, Problem Solving, Analytical Skills, Communication

Employment History

V Tech Computers — *Computer Programmer*

Aug 2022 - Nov 2023

- Designed backend logic tailored to client needs, enhancing user satisfaction.
- Debugged and optimized code, reducing errors by 30% and boosting performance.
- Developed scalable solutions, increasing system efficiency by 25%.
- Collaborated in an Agile team to deliver robust components, boosting project delivery speed by 20%.

Zensar Technologies, Hyd — *Software Engineer*

Mar 2022 – Aug 2022

- Created stored procedures, triggers, and views in Oracle PL/SQL, improving database performance.
- Optimized queries, accelerating data retrieval by 30% while maintaining data integrity.
- Designed efficient database schemas, raising operational efficiency by 25%.
- Actively contributed to code reviews and agile practices, improving team productivity by 15%.

Projects

Financial Data Visualization – JP Morgan Chase & Co. Virtual Experience

Tech: Python, React.js, JPMorgan's Perspective API, WebSockets

Developed a real-time stock price dashboard using JPMorgan's open-source tool.

Integrated and processed financial market data for improved decision-making.

Optimized API calls, improving data rendering speed by 30%

Data Analytics Dashboard -TATA IQ

Tech: Tableau, Power BI, SQL, Python (Pandas, Matplotlib)

Designed an interactive business intelligence dashboard for data-driven insights. Automated data pipelines, reducing manual reporting efforts by 50%

Visualized large datasets to identify key business trends and performance metrics

Live Air Quality Index Monitoring using IoT

- Developed a system to monitor temperature, humidity, and air quality using IoT sensors.
- Integrated backend logic to process and store data

Education:

B.Tech in Computer Science -Gudlavalleru Engineering College

June 2016 – August 2020
