EDUCATION

- BVRIT Hyderabad College of Engineering for Women (JNTUH)** Hyderabad, India
Bachelor of Technology - Computer Science and Engineering (AIML); GPA: 9.0 November 2022 - Present

SKILLS SUMMARY

- Languages:** Python, JAVA, SQL, Julia, HTML, CSS
- Frameworks:** Flask, Flutter
- Tools:** Microsoft Office Suite, Docker, Git, VS Code, MySQL, Jupyter Notebook, Google Colab, Figma
- Platforms:** Linux, Web, Windows
- Competencies:** Web Development, App Development, UX/UI Design
- Soft Skills:** Leadership, Event Management, Public Speaking, Time Management, Mentoring, Team Collaboration

EXPERIENCE

- Google Summer of Code - The Julia Language** Remote
Student Software Developer May 2025 - August 2025
 - Tables.jl Interface:** Designed a common Tables.jl interface for accessing and transforming OMOP CDM data.
 - Cohort Feasibility Tool:** Automated analysis of data availability and covariate balance in PLP studies.
 - JuliaHealth Integration:** Integrated OHDSICohortExpressions.jl, OMOPCDMCohortCreator.jl, and related JuliaHealth tools for scalable, end-to-end patient-level prediction pipelines.

PROJECTS

- HealthBase.jl & OMOPCDMFeasibility.jl (OMOP CDM, Healthcare):** Contributed to the JuliaHealth ecosystem as a GSoC fellow, improving patient-level prediction (PLP) workflows on OMOP CDM data. Enhanced **HealthBase.jl** by implementing a standardized Tables.jl interface for schema-aware data access and preprocessing. Initiated and led development of **OMOPCDMFeasibility.jl**, enabling cohort feasibility analysis, covariate profiling, and faster study design.
- MindSync – Mental Health & Wellness App (AI, Mobile App):** Flutter-based mobile app for mental well-being, featuring guided meditations, breathing exercises, affirmations, journaling, and mental health insights. Integrated with Firebase for authentication and secure data storage, and powered by Gemini 1.5 Flash for AI-driven chatbot support

PUBLICATIONS

- Patient Level Prediction in Julia – JuliaHealth Blog:** Three-part online blog on building ML pipelines with OMOP CDM clinical data using Julia, MLJ.jl, DrWatson.jl and JuliaHealth. Published May 2025.
- Bringing Julia to Health: A Concise Overview of JuliaHealth – JuliaCon Proceedings 2025:** Co-authored proceedings paper presenting the JuliaHealth ecosystem, its modular architecture, subdomains, and standards interoperability. Contributed to the initial drafting and development of key sections. (Work in progress)
- AquaEye: AI-Powered Underwater Debris Detection System:** Research paper on using YOLO models to detect underwater debris and marine life for environmental monitoring. (Work in progress)

ACHIEVEMENTS

- Selected for **Google Summer of Code 2025** – Top 1.3% out of 98,000+ applicants worldwide
- Winner of **E-Jignyasa Project Expo**, organized by JNTU Hyderabad IEEE
- Runner-Up of **R&D Showcase 2025** under the IT Department, organized by BVRIT Hyderabad
- Top 20 in **DevsHouse 2025**, a 48-hour national-level hackathon by GDG VIT Chennai
- Finalist at **PALS InnoWAH! 2024-25**, a national-level initiative by PALS, IITM Alumni
- Second Runner-Up at **Gen AI Hackathon** by NASSCOM, The SmartBridge, and FutureSkills
- Winner of **Farm to Frame AI in Agriculture** at 2K47 Innovation Day, BVRIT Hyderabad
- Ranked 55/17,000 in **GirlScript Summer Of Code 2024**, contributing to 10+ open-source projects.

POSITIONS OF RESPONSIBILITY

- Founding Lead and Technical Team Head, A.S.P.I.R.E BVRITH** Oct 2024 – Present
- Web Development and Operations Lead, TEDx BVRIT Hyderabad 2.0** Jan 2025 – Apr 2025
