

RESUME

Graphic Designer & 3D Generalist | Creative Problem Solver | Visual Storyteller | Design Innovator

About Me

A creative problem-solver and strategic visual communicator with expertise in graphic design, motion graphics, and 3D visualization. I specialize in translating complex narratives and data-driven insights into clear, impactful visual experiences. With a proven track record in both high-end conceptual branding and impactful humanitarian advocacy, I am uniquely suited to the diverse and mission-critical communication needs of the United Nations

Core Skills

Visual Identity & Branding:

Expertise in developing and applying visual identities, from conceptual development to comprehensive brand systems for institutional and public campaigns.

Motion Graphics & 3D Visualization:

Proficient in creating dynamic animated content and photorealistic 3D renders for a wide range of digital and cinematic applications.

Mission-Driven Communications:

Skilled in crafting advocacy campaigns and informational materials that simplify complex data and inspire action.

Human-Centered Design:

Focused on using design thinking and user-centric processes to create empathetic and purposeful visual solutions that solve real-world problems.

Cross-Functional Collaboration:

Experienced in leading and collaborating with cross-cultural teams to deliver integrated and impactful projects from concept to completion.

Education

B.Sc. in Animation, VFX & Gaming

Sharda University | 2022-2025

Schooling (10th & 12th)

Kendriya Vidyalaya

Projects & Experience

Luxury Product Branding & 3D Visualization

Created photorealistic 3D renders of luxury products (perfumes, watches). Designed product presentations with a cinematic, story-driven approach.

Motion Graphics for Events & Media

Produced animated visuals and showcase graphics, combining cinematic design with narrative elements.

Focused on clarity, rhythm, and impact in visual storytelling.

UI/UX Prototypes

Built an accessibility-focused interactive prototype, integrating design strategy with storytelling. Applied user-centered design to improve navigational flow and usability.

Collaborative Cinematic Projects

Contributed to 3D environments, lighting design, and animation sequences as part of team projects. Focused on integrating visuals with narrative direction.

Generative AI Exploration

Used MidJourney, Stable Diffusion, and Runway for creative ideation and visual concept development.

Experimented with AI-assisted workflows to accelerate rendering and visualization
