Education

- **Indian Institute of Technology, Kharagpur** *2023–Present*
  BS in Economics CGPA: 8.3
- **Children's Academy Convent School** *2021–2023*
  Central Board of Secondary Education

Personal Projects

- **Dynamic DCF Valuation App | Python, Streamlit** *GitHub Repository*
  - Engineered a dynamic Discounted Cash Flow (DCF) model to derive intrinsic valuations for any equity ticker by integrating real-time financial data from yFinance and FRED.
  - Automated valuation mechanics, including FCFF projection, WACC calculation, terminal value, and sensitivity analysis via user-adjustable parameters.
  - Built an interactive Streamlit dashboard enabling intuitive valuation visualization and scenario testing powered by Python financial modeling.
- **Multi-Factor Alpha Strategy | Python, Pandas, Matplotlib, NumPy** *GitHub Repository*
  - Devised a robust multi-factor quantitative strategy, leveraging Size, Value, and Low Beta factors to systematically rank and select S&P 500 equities for alpha generation.
  - Engineered automated monthly portfolio rebalancing, incorporating sophisticated ranking filters and robust data fallback mechanisms to ensure strategy integrity and continuity
  - Validated strategy performance through a 6-year backtest, demonstrating consistent outperformance against the SPY benchmark with a superior Sharpe ratio and significantly reduced drawdowns.

Experience

- **J.P. Morgan Chase Investment Banking Virtual Experience — Forage** *July 2025*
  - Identified an ideal M&A target for a client by assessing strategic and financial criteria.
  - Built a DCF model to value the M&A target and incorporated adjustments for a competing bid and supply chain disruption.
  - Prepared a two-page client briefing document summarizing the company profile and auction process.

Technical Skills

- **Languages:** C, C++, Python
- **Libraries:** Pandas, Numpy, Matplotlib, Scikit-learn
- **Developer Tools:** Git, GitHub, VS Code, Excel
- **Frameworks:** Streamlit
- **Soft Skills:** Teamwork, Communication, Time Management
- **Coursework:** Programming and Data Structures

Financial Skills

- **Investment Management:** Portfolio Management, Equity Investments
- **Financial Instruments:** Derivatives, Fixed Income
- **Financial Analysis:** Financial Statements, Ratio Analysis, Valuation Techniques
- **Interests:** Asset Management, Quant Finance, FinTech
- **Tools:** Excel, Python

Certifications

- **CFA Level I Candidate – CFA Institute** Exam Scheduled: August 2025

Achievements

- **Excelled in JEE Mains and Advanced** Scored 99.57 percentile in JEE Mains; Top 1% in JEE Advanced out of 1.2 million candidates

Coursework

- **Core Courses with Excellence:**
  - Econometric Analysis I – EX
  - Statistics for Economics – EX
  - Microeconomics I & II – EX
- **Other Relevant Courses:**
  - Probability and Statistics, Operations Research, Macroeconomics I & II
