Summary

As a Finance graduate, I bring experience in financial modeling, commercial due diligence, and strategic analysis from an internship at EY and impactful volunteer work. My experience spans across dynamic startups and established firms. I am currently leading financial literacy workshops for 500+ students and have also authored finance-related research papers, enhancing my analytical and client-focused skills. I am driven to create value by blending data-driven strategies with innovative thinking, with a keen interest in technology-driven and impact investing.
