Career Objective:

To obtain a challenging position as a **Software Developer Intern** where I can apply my knowledge of full-stack development, data structures, and problem-solving skills while contributing to the growth of the organization and enhancing my professional experience.

Technical Skills:

- **Programming Languages:** Python, Java, JavaScript, C
 - **Web Development:** HTML5, CSS3, Bootstrap, React.js, Node.js, Express.js
 - **Database:** MySQL, MongoDB, Firebase
 - **Cloud Technologies:** AWS, Azure (Basics), GCP (Basics)
 - **Tools & Platforms:** Git, GitHub, Postman, VS Code
 - **Core Concepts:** Data Structures & Algorithms, REST API Development, CRUD Operations
-

Projects:

- **Smart Crop Monitoring and Irrigation System**
Tech Stack: IoT, Sensors, Cloud Computing, Web Dashboard
Developed a smart agriculture solution for real-time monitoring of crop health and automated irrigation using sensor-based data. Integrated IoT devices for environmental data collection and used cloud services for centralized monitoring and analysis. Implemented a responsive web dashboard for farmers to monitor field conditions remotely. Presented this project at the **Entrepreneurship Hackathon by STPI Techniche, IIT Guwahati (2025)**.
 - **Responsive Web Visualization - Brain Wave Matrix**
Tech Stack: HTML, CSS, JavaScript
Designed and developed a simulation-based web interface showcasing animated neural patterns. Focused on front-end responsiveness and interactive user experience through dynamic styling and JavaScript effects.
 - **StudentHub – Academic Collaboration Platform**
Tech Stack: React.js, Node.js, Express.js, MongoDB
Built a full-stack web application enabling students to connect, collaborate, and manage group projects. Integrated user authentication, real-time updates, and project sharing features.
 - **Maharana – Python Automation Toolkit**
Tech Stack: Python, Pandas, NumPy
Developed a suite of Python automation scripts for data analysis, report generation, and productivity enhancement. Utilized data processing libraries for efficient handling of structured datasets and automated repetitive tasks.
-

Internship:

- **Data Science & AI Intern — YBI Foundation (April 2025 – June 2025)**
 - Developed and trained AI models using Python libraries such as Pandas, NumPy, and Scikit-learn.

- Performed data preprocessing, cleaning, and visualization tasks on real-world datasets.
- Gained hands-on experience with supervised and unsupervised machine learning algorithms.
- Collaborated with a team to create AI-driven solutions for academic research and industrial projects.
- Improved skills in model evaluation, feature selection, and practical deployment of AI solutions.

Certifications:

1. **KPMG UK — Introduction to Technology Job Simulation (Forage)** *(May 2025)*
Completed a virtual job simulation focused on solving real-world business problems, advising clients on technology strategies, and enhancing consulting skills in a simulated work environment.
2. **Infosys Springboard — Data Structures in Scala** *(Dec 2024)*
Gained proficiency in searching and sorting algorithms using Scala. Strengthened data structure problem-solving abilities relevant for backend development and algorithmic coding.
3. **Intel Corporation — AI for Leadership & Entrepreneurship** *(Dec 2024)*
Understood applications of Generative AI for leadership roles. Learned AI-driven business strategies, entrepreneurship fundamentals, and innovation principles.
4. **LinkedIn Learning — Practical GitHub Actions** *(Dec 2024)*
Mastered automation of workflows using GitHub Actions, enabling continuous integration and deployment (CI/CD) in software projects.

Achievements & Participation:

- **Conversational Agentic AI Chatbot Hackathon (2025)**
Participated in an AI-based hackathon organized by Assessli on Unstop. Contributed towards designing a chatbot using advanced conversational AI techniques.
- **Free Online Coding Challenge by Engiverse (2025)**
Represented Government Engineering College, Ajmer in a national-level coding competition organized on Unstop. Collaborated with team members to solve algorithmic problems.
- **Data Science 101 Workshop – GeeksforGeeks Chandigarh University (2025)**
Attended a virtual workshop focused on the basics of data science, machine learning fundamentals, and its practical applications. Enhanced understanding of data science career opportunities.
- **KPMG Virtual Experience – Introduction to Technology Job Simulation (Forage)**
Completed a virtual experience simulating real-world technology consulting scenarios. Developed client advisory reports, analyzed technology strategies, and improved problem-solving skills in simulated business environments.

Education:

- **Master of Computer Applications (MCA) — Government Engineering College, Ajmer** *(2024–2026)*
Relevant Coursework: Data Structures, Web Development, AI/ML, Soft Computing, Computer Networks
- **Bachelor of Arts — Government College Behror (RRBMU)** *(2020–2023)*
Specialization: English Literature, Political Science
