EDUCATION

Indian Institute of Information Technology, Jabalpur

Nov 2022 – June 2026

Bachelor of Technology in Computer Science and Engineering, **CPI: 8.1**

Jabalpur, Madhya Pradesh

Relevant Coursework: Data Structure, Algorithms, Operating System, Deep Learning, Probability and Statistics, Artificial Intelligence, Data Science, Algorithms, Machine Learning, Database Management System, Agile Methods, Mathematics

EXPERIENCE

AEH Intern | Accenture (Onsite)

May 2025 – July 2025

- Built Android gauge-reading automation with YOLOv8 OCR, reducing manual effort 60 - 70% (10 - 12 hrs saved per 100 shipping ops).
- with OCR accuracy of 91.6% on 500+ documents/day through data-labeling and hyper-parameter tuning.
- Added dynamic chunking & Chain-of-Thought prompting in RAG pipeline, lifting top-3 hit-rate to 93% and Integrated NLP modules that halved shipping-document turnaround time

CODING PROFILES

Codeforces (Max Rating: 1628 – Expert): /codeforces.com/profile/_Sterben- (400+ Problems Solved)

LeetCode (Max Rating: 1929 – Knight): /leetcode.com/u/_Sterben (600+ Problems Solved)

PROJECTS

RAG Builder | Python, mpnet, llmware

Sep 2024

- Built a terminal tool to set up a local Retrieval-Augmented Generation pipeline using mpnet and llmware models.
- Designed from scratch without high-level frameworks or vector databases, capable of processing 10,000+ page documents.
- Achieved 93% retrieval accuracy using efficient in-memory vector search and optimized chunking strategies.

Fusion - ERP for IIITDMJ | Django REST, ReactJS, nodeJs, PostgreSQL

August 2024 – April 2025

- Modernised week-long, paper workflow into REST micro-services; 100 daily requests now processed same-day.
- Led a team of 10 members; migrated frontend from Django templates to ReactJS, and backend from Function Based View to Class Based Views for a modular, scalable architecture.
- Integrated Redux for global state management, enabling seamless navigation without full page reloads.

Adinocarcinoma-Cancer-Classification | VGG16, MLflow, DVC, FastAPI, AWS

Feb 2025

- Developed an end-to-end chest cancer classification system using transfer learning on the VGG16 model.
- Implemented complete MLOps pipeline using MLflow and DVC for tracking, versioning, and reproducibility.
- Deployed the solution on Amazon EC2 with a FastAPI backend and integrated CI/CD via GitHub Actions for scalable delivery.

TECHNICAL SKILLS

Languages & Frameworks: Python, C++, Flask, FastAPI, SQL

AI/ML & DevOps: TensorFlow, PyTorch, HuggingFace, scikit-learn, NLTK, Git, OpenCV, MLflow

Cloud & Databases: AWS, MongoDB, PostgreSQL, MySQL

Tools & Platforms Linux, Unix, GitHub, VS Code, Jupyter Notebook, CMake, GDB

LEADERSHIP & ACHIEVEMENTS

IIT Roorkee ML Competition - ThermaOracle: Winner among 120 teams. Predicted temperature using ensemble ML models, achieving **3.9 RMSE**, a 10% improvement over the second-best score.

Patent Co-Inventor – Wearable Asthma Diagnostic System: Published by Indian Patent Office (App. No. 202521069749 A, Aug 2025). Designed an AI-powered device to build an Indian patient dataset for India-specific healthcare models.

Programming Guide (TPC): Mentored 40+ juniors through their early programming journey with growth mindset.

Volunteer Educator, Jagrati Program: Taught 100+ underprivileged children with custom lesson plans.
