LINKEDIN: linkedin.com/in/dr-anuja-wasnik-5b517b357

PROFILE:

A dedicated and detail-oriented healthcare professional with a Bachelor of Ayurveda Medicine and Surgery (BAMS) and currently pursuing a Master of Public Health (MPH). Passionate about healthcare management and research. Skilled in research related to **nutrition, and health outcomes**, with experience in both **primary data collection** and **secondary data analysis** (NFHS-5). Focused on evidence-based strategies for **disease prevention, policy development, and improving nutrition related interventions and public health practices**.

WORK EXPERIENCE:

RESIDENTIAL MEDICAL OFFICER RISING MEDICARE HOSPITA, PUNE.

Managed admitted patients, ensuring comprehensive inpatient care and treatment coordination. Handled emergency cases, providing immediate medical attention and stabilization. Collaborated with multidisciplinary teams for patient management and treatment planning

RESIDENTIAL MEDICAL OFFICER SEVENSTAR HOSPITA, NAGPUR 2023-2024

Oversaw emergency and critical care patients, ensuring timely diagnosis and intervention. Supervised patient admissions, treatment progress, and discharge planning. Worked closely with specialists to optimize patient care and hospital workflow

EDUCATION:

MASTERS OF PUBLIC HEALTH (2024-2026)
SRMIST, CHENNAI.

BACHELORS OF AYURVEDIC MEDICINE
AND SURGERY (2016-2021)

MAHARASHTRA UNIVERSITY OF HEALTH
SCIENCE, NASHIK

SKILLS:

- Public Health Research & Epidemiology
- Statistical Analysis: SPSS, STATA

- Primary & Secondary Data Handling
- Patient Care and Clinical Assessment
- Data Management in **MS Excel**
- Fieldwork & Community Engagement
- Strong Communication & Presentation Skills.

RESEARCH & ANALYTICAL EXPERIENCE:

- **CHILD HEALTH AND NUTRITION:**
Qualitative Research on Caregiver Perception of ORS and Zinc Usage Studied caregiver attitudes and utilization of ORS/zinc in Tamil Nadu, Telangana, and Maharashtra. Identified key behavioral, cultural, and systemic barriers affecting diarrhoea treatment in children. Results contributed to strategies for improving public health messaging and increasing uptake of life-saving interventions.
- **SECONDARY DATA ANALYSIS (NFHS-5):**
Analyzed National Family Health Survey (NFHS) data to explore the impact of maternal media exposure on dietary practices for children aged 2 to 5 years. The research focused on whether regular exposure to television, radio, or newspapers by mothers correlates with improved dietary diversity in young children.
