

Monthly Internship Report

Name: Sanchit Rana

Email ID: samchitrana24574@gmail.com

Address:- z Block Shyam vihar Najafagarh New Delhi

College: Lovely Professional University, Punjab

Internship Organization: CRY (Child Rights and You)

Internship Duration: 10th June 2025 – 10th July 2025

Location of the field :- Saksham, Shahbad Dairy, Delhi, 110042

1. Introduction

This report highlights the activities and learning outcomes of my one-month field internship at CRY. During the internship, I engaged in child-focused fieldwork, educational support, and toolkit development, along with exposure to data systems regarding missing children in India.

2. Weekly Overview

10th June 2025 – Reporting & Orientation

Reported to the CRY main office for orientation.

Understood CRY's child rights framework, programs, and community engagement methods.

Got an overview of how field interns are expected to contribute to both research and academic support projects.

11th–14th June 2025 – Data Collection

Collected data on missing children from portals such as TrackChild and ZIPNET.

Understood data flow and case reporting systems used by NGOs and government agencies.

14th June – 10th July 2025 – Teaching & Toolkit Development

Daily Activities:

- Conducted educational activities at the Saksham Centre (English, Hindi, Maths).
- Initiated the creation of an English Grammar Toolkit designed for Classes 6–9.
- Continued daily teaching for Saksham students in English, Hindi, and Maths.
- Conducted activities such as:
 1. Hindi: Reading fluency, vocabulary building, and grammar.
 2. English: Speaking practice, grammar lessons, and reading comprehension.
 3. Mathematics: Arithmetic, problem-solving, and mental math exercises.
 4. Encouraged active participation through games, group reading, and quiz-based learning.
 5. Used knowledge-based games to enhance student engagement and retention.

3. Weekly Internship Activities (3rd Week)

3.1. Activities

3.1.1. Teaching Hindi, English, Maths, and Science

Throughout the third week, I continued teaching core subjects.

Hindi: Focused on reading fluency, grammar, and vocabulary enhancement.

English: Conducted speaking activities, basic grammar lessons, and reading comprehension exercises.

Mathematics: Helped students practice fundamental arithmetic and problem-solving.

Science: Introduced basic science concepts using simple experiments and daily-life examples.

By tailoring lessons to children's understanding levels, I promoted active participation and reinforced concepts in an interactive and friendly manner.

4. Key Contribution: English Grammar Toolkit

1. One of my major individual contributions was preparing a beginner-friendly English Grammar Toolkit for government school students (Classes 6–9).
2. The toolkit includes:
 - Grammar topics with simple rules
 - Hindi translations for better understanding
 - Practice exercises and answer keys
 - Writing tasks: letters, paragraphs, and essays
 - Common errors and corrections

5. Skills Learned

- Field data collection and government portal navigation
- Academic content development and teaching skills
- Communication and teamwork
- Documentation and report preparation
- Understanding of missing child response mechanisms

6. Conclusion

This internship experience gave me both academic and emotional insight into child-focused development work. I not only improved my teaching and data handling skills but also contributed meaningfully to educational support for underprivileged children.
