

Internship at Child Rights and You

Final Submission Report

Submitted By: Monolisha G N

Date: 29.05.2025

ACKNOWLEDGEMENT

I would like to express my sincere gratitude to CRY for providing me the opportunity to pursue my internship. It has been an invaluable learning experience that has contributed to my personal and professional development.

I thank my supervisor, Sir Manoj Thapa for his guidance, support and encouragement throughout his journey.

INTRODUCTION

Aims and Objective

The main aim of this internship is to gain practical experience, improve my skills, explore my career path, connect with industry professionals and to apply what I have learnt. I would like to apply my strengths, control my weaknesses and make use of this opportunity for my personal and professional development.

Expected Outcomes

I expect to explore the career path I've chosen if it suits me or not. I expect to gain practical experience out of academic setting. I would like to apply my acquired skills and enhance my skills. I also like to come out of my comfort zone, leave out my fear during this internship.

INTERNSHIP EXPERIENCE

This was an online internship. My mentor would allocate works through an online meeting. I will have to finish works within stipulated time and mail him. Each task was different and provided me with unique experience. Certain tasks were easy, certain task required my full potential. Mostly, I was allotted the work of ideation for events like Music event, Colleges, Environment Day. Other works included creating certificates and transcribing audio files. Transcribing was the most difficult part as it was a repetitive work requiring listening skill, fast typing speed. I got to know about the real-life experience of people from villages through those audio files. It was heart breaking to know some of the incidents. Apart from these works, I spent time in fundraising for Girl Child Education. The goal was 5000 rupees. I was required to raise funds from my known contacts. I hesitated to share the link at first, but I went ahead with it because of the cause. Overall, it was a great experience of learning, getting to know things. I've always wanted to engage myself in an NGO or in a social sector. This was a wonderful opportunity. Though, I didn't get to work offline, getting real experience, I'm happy to have contributed through my tiny efforts. I wish I could do more in the upcoming future.

LEARNING OUTCOMES

There were several learning outcomes throughout this internship. I gained hands-on experience in working with Canva. Transcription improved my verbal communication. I learnt to simplify complex topics like environment day into engaging content. I practiced brainstorming and ideating for college events and campaigns. I was able to manage time efficiently with demanding tasks. Supporting a fundraiser helped me understand how to engage donors, outreach and how to communicate a cause. I learnt to adapt to different kinds of tasks varying from creative, technical and repetitive. Transcription taught me patience and discipline. At the end of this internship, I felt that offline internship would have been better in terms of learning, getting real-life experience.

CONCLUSION

I would have never tried for an internship if it wasn't compulsorily required by the University. But after this internship, I am eagerly waiting to apply for further internships. It was really a great experience of learning, trying out new things, coming out of my comfort zone. I realized that great things require just small efforts by huge people. This internship helped me grow professionally and personally. I am satisfied with it.
